DETAILED ACTION

Supplemental Election/Restrictions

1. Applicant correctly pointed out that the restriction requirement did not include claims 14 and 15. A new restriction requirement is made. The examiner disagrees with applicant's characterization that there are only three groupings, as claims 14 and 15 as depending from claim 14 define an adapter that is structurally different than that of the adapter of Group III.

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, drawn to a method.

Group II, claim(s) 5-10, drawn to a combination.

Group III, claim(s) 11-13, 15(as dependent on claims 11, 12 or 13) drawn to a subcombination.

Group IV, claim(s) 14, 15(as dependent from claim 14), drawn to a subcombination.

3. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The method claims do not require the height of the positioning device be adjusted; the apparatus does not require the lens be alignable with the holder; the apparatus does not require the details of the adapter of group III or group IV; the adapter of group III does not require the structures of the adapter of group IV.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M Rachuba whose telephone number is 571-272-4493. The examiner can normally be reached on Monday-Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail can be reached on 571-272-4485. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
